Frese per la lavorazione di acciai inossidabili  
End mills for the machining of stainless steel materials

**FRANKEN**  
**TiNox-Cut**

Frese Tinox Cut "Base" in MDI  
Solid Carbide End Mills "Base"

**New**

Le frese in metallo duro integrale TiNox-Cut "Base" sono state sviluppate per lavorazioni su acciai inossidabili e resistenti agli acidi.

Questi utensili rappresentano l'esecuzione "Base" della nostra gamma "TiNox" e sono stati progettati per uso universale per la meccanica generale, l'industria chimica e alimentare.

Queste frese possono essere utilizzate per operazioni di sgrossatura e finitura. La scelta di un rivestimento di ultima generazione combinato a un substrato in carburo di tungsteno ad alte prestazioni, permette di applicarle anche in alcune lavorazioni a secco, in relazione alla strategia di fresatura e al tipo di acciaio inossidabile. (es. 1.4301, 1.4571, 1.4404).

The solid carbide end mills TiNox-Cut "Base" were developed to meet the special requirements for machining stainless- and acid-resistant steels.

These tools are the entry level products into our TiNox-Cut product line and are designed as a universal solution especially for mechanical engineering as well as the chemical and food industries.

These milling tools can be used both for roughing and finishing operations. The use of the latest coatings in combination with a high performance carbide substrate makes it possible – depending on the milling strategy – to use them also for dry machining of some stainless- and acid-resistant special alloys (e.g. 1.4301, 1.4571, 1.4404).
